

FS Degreaser

Biodegradable Heavy Duty Degreaser

DESCRIPTION

FS Degreaser is a biodegradable Heavy duty cleaner. It is a phosphate and solvent free, water based degreaser formulated to remove heavy deposits of grease, oil, dirt and grime from machinery, engines, concrete floors and most badly soiled areas. **FS Degreaser** is designed to efficiently penetrate and cut through grease, and its combination of biodegradable surfactants help to remove the grease during the hosing-off operation.

APPLICATIONS

FS Degreaser is a reasonable replacement for the traditional solvent based degreasers and has the advantage over most solvent types in that it is "quick breaking" which makes it suitable for use through oil / water separation systems.

ADVANTAGES

- Biodegradable, non-dangerous, non-hazardous, non-flammable
- Water based
- Non caustic
- Contains no solvents, phosphates
- Effective in fresh and extremely poor quality water
- Free rinsing and may be used with all water temperatures
- Safely removes heavy deposits such as grease, oil, diesel exhaust stains, dirt, gum and grime from all washable surfaces.

TYPICAL PROPERTIES

Physical appearance	Blue liquid
Specific Gravity	0.9 - 1.10
pH	11.0
Solubility	100%

RECOMMENDED TREATMENT

Spray FS Degreaser on neat over the soiled area, allow sitting for 10-15 minutes, and then rinse with water. Repeat as needed for heavily soiled areas

PACKAGING

20 litre, 210, and 1000 litre drums or in disposable 20lt
