

Quick Grout

Fast Setting Cement

DESCRIPTION

Quick Grout is high strength cement formulated to fast set in approximately 4-5 minutes.

APPLICATIONS

- Cementing casing or pipe
- Cementing pre-collars

ADVANTAGES

- Faster setting times than standard Gypsum cements
- Less rig down time due to accelerated setting times
- Higher strength than standard Gypsum cement

LIMITATIONS

- Temperature and water quality will affect the setting time.
- Care must be taken when mixing to ensure that the Quick Grout doesn't set too early.
- Due to fast setting time mechanical pumping is not recommended

TYPICAL PROPERTIES

Specific Gravity	2.3-2.9
Solubility In Water	Not soluble
Appearance	White greyish powder
Odour	Slight cement odour

USAGE

Add 5 litres of water to every 8kgs of Quick Grout.
Pour around the casing or pre-collar.
Initial setting time 3-4 minutes fully set in 6-7minutes

PACKAGING

15kg plastic pail
