

Rapid Set 15

Gypsum Cement

DESCRIPTION

Rapid Set 15 is high strength gypsum cement formulated to set hard in approximately 15 minutes.

APPLICATIONS

- Cementing casing or pipe
- Cementing pre-collars
- Plugging lost circulation zones
- Cementing unstable grounds/formations
- Cement plug prior to wedging off.

ADVANTAGES

- Quick setting time compared to standard cement

METHODS OF ADDITION Use 8kg of Rapid Set 15 to every 5 litres of water

LIMITATIONS

- Temperature and water quality will effect the setting time.
- Care must be taken when mixing and pumping to ensure that the Rapid Set 15 doesn't set too early.

TYPICAL PROPERTIES

Specific Gravity	2.4
Melting Point	1450°C
Pour Point	-8°C
Solubility In Water	Very slight
Appearance	Off white powder
Boiling Point	120°C
Odour	Slight plaster odour

USAGE

Bioassay information available upon request.

PACKAGING

20kg plastic pail
