

Core Lube

Inner Tube Lubricant

DESCRIPTION **Core Lube** is specially formulated to serve as a dual action lubricant. Core Lube improves core entry and removal by lubricating the inner tube. Core Lube is a light brown paste consisting of vegetable fatty acids.

APPLICATIONS

- Reduces core removal time
- Effective in all mud types and in hard and soft water
- Allows highly fragmented and broken core to enter the tube

ADVANTAGES

- Effective in a range of water conditions
- Concentrated product – very economical
- Biodegradable, environmentally acceptable, and non-hazardous
- Will not stain core

USAGE To lubricate the inner tube, Smear a generous spoonful of Core Lube inside the inner tube above the core lifter prior to attaching the core lifter casing.

TYPICAL PROPERTIES

Physical appearance	Light brown paste
pH	9.5 – 10.5
Solubility in Water	Totally Soluble

PACKAGING 8 kg Pails
