

# FS Truckwash

## Biodegradable Heavy Duty Cleaner / Degreaser

### DESCRIPTION

**FS Truckwash** is a biodegradable Heavy duty cleaner and degreaser. FS Truckwash is a "New Age" truck wash which can be used for water based degreasing. The product has the advantages of being biodegradable, and contains no harmful solvents, no phosphates, and no caustics. FS Truckwash can be used for cleaning in environmentally sensitive water catchment areas. The water based solvents along with the technically advanced surfactant system rapidly penetrate, suspend and emulsify grease, oil and other soils

### APPLICATIONS

At lower concentrations (1:100, 1:50 or 1:30), FS Truckwash can perform the functions of a froth and bubble type truck wash very successfully. FS Truckwash can be used for cleaning diamond core samples. At higher concentrations (1:20, 1:10, or even brushed on neat ) it is a reasonable replacement for the traditional solvent based degreasers and has the advantage over most solvent types in that it is "quick breaking" which makes it suitable for use through oil / water separation systems.

### ADVANTAGES

- Biodegradable, non-dangerous, non-hazardous, non-flammable
- Water based
- Effective in fresh and extremely poor quality water
- Free rinsing and may be used with all water temperatures
- Safely removes heavy deposits such as grease, oil, diesel exhaust stains, dirt, gum and grime from all washable surfaces.

### TYPICAL PROPERTIES

Physical appearance	Green liquid
Specific Gravity	0.9 - 1.10
pH	11.0
Solubility	100%

### RECOMMENDED TREATMENT

General purpose cleaning:

Add 1 part Truckwash to 100 parts water.

Vehicle cleaning:

Add 1 part Truckwash to 30 parts water.

Heavy duty cleaning or light degreasing:

Add 1 Truckwash part to 10 parts water.

May be used neat as a parts cleaner/degreaser. Brush on neat. Agitate with brush to assist penetration. Stand for 10 - 20 mins, then wash off.

### PACKAGING

20 litre, 210, and 1000 litre drums or in disposable 20lt
